GENDER TRANSFORMATIVE AND RESPONSIBLE AGRIBUSINESS INVESTMENTS IN SOUTH-EAST ASIA (GRAISEA)

1 APRIL 2015 – 30 JUNE 2018
In Cambodia, the vast majority of the population lives in rural areas and sustains its livelihood from agriculture, especially rice farming. Oxfam sees rice as an important and strategic commodity, both in Asia and worldwide. Despite a relative decline in total agricultural and economic output in the region and the world, and to some extent in Cambodia, rice farming is still a key source of income for smallholder producers and their families, especially women. Yet, many rice producers remain poor and vulnerable because of inequalities in rice value chains.

Among others, the rice sector is facing a range of social, environmental, and economic issues that include:

- Decreasing returns for small-scale producers
- Inadequate uptake of responsible agribusiness practices
- Marginalization of women in the rice value chain
- High water footprint
- Negative impacts from and contribution to climate change

GRAISEA’s Cambodia programme focuses on three intertwined approaches:

- Influencing the Corporate Social Responsibility (CSR) agenda and other private sector regulatory frameworks in Cambodia and the region with ASEAN and other member-states, and with eading agribusiness companies and multi-stakeholder initiatives both in the region and in the country.
- Demonstrating gender transformative and responsible agribusiness investments for smallholders, particularly for women in the certified organic rice value chain in Preah Vihear province.
- Promoting responsible and innovative investments among small and medium enterprises.

Oxfam and its partners are strategically working at both local and national level to ensure the target outcome. We work with them through:

- The establishment of The CSR Platform Cambodia, a multi-stakeholder initiative aiming at promoting CSR and responsible business practices in Cambodia to benefit women and men smallholder producers and workers
- Policy advocacy at national level on key pieces of legislation and regulations, such as the draft Environmental Code and Environmental Impact Assessment Guidelines
- Technical and capacity building support to selected agricultural cooperatives in Preah Vihear and the Preah Vihear Meanchey Union of Agricultural Cooperatives

The GRAISEA programme in Cambodia seeks to achieve improved livelihoods of small-scale rice producers through more responsible and inclusive value chains and private sector investments, and women demonstrating economic leadership.

**STRATEGIC PARTNERS**

- Preah Vihear Provincial Department of Agriculture
- Preah Vihear Meanchey Union of Agricultural Cooperatives
- Amru Rice
- CSR Platform Cambodia’s members from private sector and civil society

**IMPLEMENTING PARTNER**

Oxfam works closely with well-established and experienced local Cambodian NGOs to deliver the programme’s activities and achieve its expected results:

- NGO Forum on Cambodia (NGOF)
- Development and Partnership in Action (DPA)
