

OUTREACH 2020

APR 2020-MAR 2021

The ultimate aim of Oxfam is to see Cambodians, especially women, youth, marginalized and discriminated groups, being empowered to hold the government and others with power accountable so that they can exercise their right to build a resilient society free from poverty and injustice. To achieve this, Oxfam employs a two-pronged approach: empowering civil society and grassroots social movements, and influencing the government and private sector in their investment and responsiveness.
